

# CLR | multi slide

High Performance - Minimal Frame

The CLR | multi-slide is our premium European engineered, thermally broken, minimal frame - maximum view sliding door series. This system features various track configurations, stainless steel hardware, triple pane glazing, an integrated handle and a 1" (26mm) stile that allows for an unobstructed view. CLR | multi slide is the perfect solution for areas where thermal, air, water and structural values are a critical factor. The panels neatly slide away, allowing for a unified space indoors or out.

- Application** Patios, verandas, balconies, bars, greenhouses, restaurants, hotels, shopping malls, pool areas, hot tub surrounds, etc.
- Materials** The profiles on the CLR | multi slide are composed of 6060 aluminum. The 1-5/8" (42 mm) thermal break within the aluminum profiles are composed of fiberglass reinforced polyamide bars, which provides excellent
- Dimensions** Made-to-measure door panels for openings up to 144" (3658mm) in height. The CLR | multi slide system spans widths up to 576" (14630mm) with various multi-panel configurations to choose from.
- Sliding** The CLR | multi slide is a bottom weighted system that runs on two stainless steel rails with stainless steel wheel assemblies. Every door panel has adjustable wheel assemblies easy installation and adjustment.
- Closure** The CLR | multi slide features an integrated flush mount handle design that is built into the door frame. The integrated handle is available with a key lock.
- Features** The CLR | multi slide's lower track performs flawlessly when faced with heavy rain and high winds, while only being 7/8" (23mm) high. The CLR | multi slide's panel frame is a minimal 1" (26mm) wide to allow for an unmatched sleek and contemporary look.

## Specifications
