

# Slide Clear- Vertaslide Lowering Window

Thermally Broken Vertical Window System

The Vertaslide is our exclusive, thermally broken, vertically moving, motorized, retractable window and railing system. With the push of a button you can control your exposure to the outdoors by raising and lowering the panels. The panels neatly stack flush with the bottom panel creating a barrier similar to a railing.

- Application** Patios, Verandas, balconies, bars, greenhouses, restaurants, hotels, shopping malls, etc.
- Construction** The Vertaslide frames are expertly powder coated or anodized and are comprised of 6060 aluminum. The optional thermally broken Vertaslide system has a 15/16" (24mm) polyimide thermal break for applications where thermal values are an important factor.
- Dimensions** The Vertaslide has a maximum width of 133-34" (3400mm) wide and a maximum height of 120" (3048mm) high. Each system can be configured to use 2, 3 or 4 panels. ( a 4 panel system has 2 fixed panels)
- Operation** The Vertaslide system is motorized with a tubular motor that is housed at the top of the opening. The motor uses steel cables to raise and lower the panels and is controlled by a wall mounted switch or remote control.
- Features** The Vertaslide system is equipped with a safety device that automatically engages if any of the panels unintentionally disengage. The tracks in which the panels operate have been engineered to create a weatherproof seal when the system is closed.

## Specifications

<b>Operation</b>	Motorized
<b>Thermally Broken</b>	Yes
<b># of Panels</b>	2 - 4
<b>Standard Glazing</b>	7/8" (23mm) IGU
<b>Double Pane Specs.</b>	5/8" - 1 1/16" (16-27mm)
<b>Max System Width</b>	133-3/4" (3400mm)
<b>Max System Height</b>	120" (3048mm)
